

Singh Kanishka

Aspiring Software Development Engineer

kanishka2704@gmail.com | 9998768832 | Vadodara | <https://www.linkedin.com/in/kanishka-singh-678663383/> |

<https://github.com/KanishkaSingh-2004>

Full-stack developer skilled in React.js, Node.js, Express.js, and MongoDB, with hands-on experience building traceability dashboards, expense-tracking apps, and travel-planning platforms using REST APIs and layered architecture. Strong DSA fundamentals. Seeking an SDE internship to build scalable, real-world web applications.

PROFESSIONAL EXPERIENCE

Backend AI Engineering Intern

Jun 2026 | Remote

FlyRank

- Building and integrating AI models and APIs into backend systems
- Working with [Node.js/Python — let me know which] to develop and maintain backend services
- Collaborating with the engineering team on [specific feature/product area, if you can share]

EDUCATION

Bachelor of Technology in Computer Science, Parul University

2023 – 2027

GPA: 8.24

PROJECTS

SecureChainLedger (Pharma Blockchain Platform)

<https://github.com/KanishkaSingh-2004/SecureChainLedger>

React.js | Tailwind CSS | JavaScript | REST APIs

- Developed the frontend interface for a permissioned blockchain-based pharmaceutical traceability system
- Built responsive, user-friendly dashboards for tracking batch lifecycle and supply chain events
- Designed reusable UI components ensuring scalability and consistent user experience

Expense Tracker App

<https://github.com/KanishkaSingh-2004/Expense-Tracker-App>

React.js | Tailwind CSS | JavaScript | REST APIs | Node.js | MongoDB

- Developed a responsive expense tracking application for managing daily expenses and budgets
- Built interactive dashboards for tracking transactions and spending analysis
- Implemented REST APIs for adding, updating, and managing expense records
- Designed reusable UI components for scalability and better user experience

TRAVIQO

<https://github.com/KanishkaSingh-2004/Traviqo-master>

React.js | Node.js | Express.js | PostgreSQL | PrismaORM | REST APIs | LayeredArchitecture | Javascript | HTML | CSS3 | Git&Github

- Enterprise-Grade Intelligent Travel Planning Platform
- Developed a full-stack travel planning web application
- Prisma ORM- Implemented RESTful APIs, itinerary management, budget tracking, packing assistance, and collaborative trip planning using a scalable layered architecture

SKILLS

Programming & Frameworks

C | Java | JavaScript | Python, Node.js | Express.js | React.js

Databases & Cloud

SQL | MongoDB, AWS (EC2, Lambda, S3)

Tools & Infrastructure

Git | Data Structures & Algorithms | OS | DBMS | Object-Oriented Programming | Computer Networks

CERTIFICATIONS

Computer Networks and Internet Protocol — NPTEL, IIT Kharagpur (12-week, Jan-Apr 2025)

Introduction to Internet of Things — NPTEL, IIT Kharagpur (in progress, expected completion 2026)
